Globalstar GSP 1600

Satellite Phone Accessories

Hands-free Vehicle Kit (Sold Separately)

The Globalstar GCK1410 hands-free car kit is fully data enabled and is ideal for those who travel for work and leisure around the country enabling hands-free communications whilst inside a vehicle. The hands-free car kit cradle is connected to a separately mounted speaker and microphone and to externally mounted antennas. Simply remove your GSP1600 phone from its cradle when outside of your vehicle to enjoy the convenience of a handheld phone that keeps you in touch wherever life takes you.

Includes

- Hands-free microphone
- Hands-free speaker
- GSP 1600 docking cradle with base connectors
- Electronics module
- Connection cables
- Satellite antenna

Vessel Kit (Sold Separately)

Providing voice and data coverage around Australia and its surrounding waters, out to New Zealand, New Caledonia, and up to 500 nautical miles into the Southern & Indian Oceans, the Globalstar GMK1410 hands-free car kit with marinised antenna enables hands-free communications while you are inside a vessel at sea. The GMK1410 comes with an externally mounted antenna enclosure, an internally mounted electronics hands-free cradle and privacy handset. The hands-free cradle holds the GSP1600 handheld portable mobile phone by simply detaching the GSP1600 from its cradle you can enjoy the convenience of full mobility away from the vessel.

Includes

- Personal privacy handset
- Hands-free microphone
- Hands-free speaker
- GSP 1600 docking cradle with base connectors
- Electronics module
- Connection cables
- Marine satellite antenna

Starpak (Sold Separately)

The Starpak 1410 is the smallest, most compact and ultra protected docking station for the Qualcomm GSP1600 handset. Weighing only 4.4kgs (with Qualcomm GSP1600 phone) the Starpak is conveniently lightweight, providing safe and easy portability. It is ideal for use as a portable car-kit in trades or emergency service vehicles where environmental protection and robustness is vital. The kit utilises the world renowned Pelican 1400 series Ultra High Impact water and shock resistant case. This ensures that the GSP1600 satellite phone and docking station is always protected from the rigors of everyday use and the harshness of extreme, rugged working conditions.

Includes

- Personal privacy handset
- 12 volt DC car charger
- Safety "unit on" status LED
- Built-in moisture protection unit
- Impact lined/high density foam
- RS232 serial data cable
- Hands-free microphone and speaker
- Electronics module
- GSP 1600 docking cradle
- Globalstar magnetic mounted satellite antenna
