

Iridium GO! exec™

FACT SHEET

A Smart Companion for Your Smart Devices

Iridium GO! exec is a portable wireless access device for smartphones and laptops. Powered by the Iridium Certus® 100 midband service, it enables Wi-Fi connectivity for select messaging, email, social media, weather, and light web browsing apps, as well as simultaneous access to two high quality voice lines for calls to friends, family, and co-workers.

This light and compact product offers portable personal and office connectivity and combines the features of a battery powered Wi-Fi access device with the built-in functionality of an Iridium® satellite phone. Users can make phone calls directly on Iridium GO! exec using the built-in speakerphone and microphone or connect wirelessly to the device within a range of up to 30 m (100 f) from their smartphone using an Iridium GO! exec app for phone calls and internet access.

Key Features

- Modern, compact, portable design with color touchscreen
- Up to 22 Kbps Transmit / Up to 88 Kbps Receive
- Built-in secure Wi-Fi connectivity
- Multi-user access for up to two voice calls or multiple data connections simultaneously
- Built-in speakerphone & microphone functionality
- Dual USB-C, ethernet & external antenna / GPS ports
- Standard apps with open connection or app / web filtering
- Easy setup & use with no pointing required; power on & connect just by raising the antenna
- Operate from fixed or mobile location with omni-directional connectivity
- Quickly connect to the internet with a built-in connection manager for session controls & pre-configured filtering options to help manage airtime usage
- Register for 24/7 SOS monitoring & support from 3rd party emergency response coordination center (IERCC)

Iridium GO! exec™

Markets

Iridium GO! exec is ideal for users that require portable communications with voice and IP connectivity. It can be used in a stationary setup like an NGO camp site or mobile environment like a sailboat, allowing users flexibility in both work and personal situations. Iridium GO! exec extends communications to a wide variety of markets, including:

- Travel & Leisure
- Recreational Marine
- NGO & Humanitarian
- Scientific Research
- Remote Industry
- General Aviation

Applications

Iridium works with partners to offer custom apps for purpose-built email, weather, or industry-specific requirements to provide more cost-effective and efficient use of the Iridium Certus 100 midband data connection.

Recommended Standard Apps

These apps have been tested and verified to pair well with the Iridium GO! exec:

- Chat Apps: WhatsApp, Viber, Line, Signal, Telegram
- Email Apps: Outlook, Gmail, Yahoo
- Social Media: Twitter
- Browsing: Opera, Firefox
- Financial Apps: Venmo, Zelle
- Home Automation: Google Home

Customized Apps

- Iridium GO! exec
- Iridium Mail
- Third-party Iridium partner apps: tested and certified for compatibility. Learn more at: www.iridiumgoexec.com

In general, communication and transactional apps are suitable for use over the midband connection while entertainment apps that provide multimedia / video content will not operate on this product. Additional apps can be used, but may not be optimized for remote data connectivity, resulting in service degradation.

About Pivotel

Pivotel is an Australian owned and operated provider of rural, remote and critical communication solutions for people, organisations and assets. Pivotel develops and deploys solutions that are at the leading edge of technology, giving the world accessible communication solutions that connect people with vital assets, information and each other.
